

Why should you use Forrestdale Recycling?

- Locally owned and operated
- Cost savings vs sending to landfill
- Great location
- Over 98% recycled
- Reinvestment back into local communities

Steve Marshall and his family have lived in the Armadale area for over 25 years. With a wealth of knowledge and experience in demolition, landfill and recycling, we are able to assist with all your earthworks, demolition and waste disposal requirements.

As the government levy on landfill continues to increase, the cost of disposing of waste to landfill continues to grow. As well as diverting construction and demolition waste away from landfill, Forrestdale Recycling is an environmentally friendly project to build up previously unusable land in the Forrestdale Business Park. Rather than importing natural resources from Perth's limited quarry supplies, we recycle C&D waste and produce a suitable alternative product that will be used to aid the expansion of commercial activity in Forrestdale. All of our recycled product is subject to stringent testing procedures, to ensure the end result is a safe, clean and well compacted material that can be built on.

Forrestdale Recycling is located just off the corner of Tonkin Hwy and Armadale Rd in the Forrestdale Business Park. Only 15 minutes off the freeway, we are situated nearby many useful facilities that can help you to keep working efficiently. Some of the nearby businesses our customers use regularly are:

- Bunnings
- Manuli Fluidconnectors (hydraulic hoses and fittings)
- M&S Mechanical
- West Coast Laser Cutting
- Frenchline Fabrication
- Caltex
- Armadale Steel Supplies
- All West Plant and Equipment Hire

Our strong commitment to recycling ensures that minimal waste is sent onwards to landfill. We recycle all metals, greenwaste, timber, sand and building rubble. Less than 2% of the material tipped at our facility is sent to landfill.

As part of our endeavour to support local communities, we have committed to each council we engage with to reinvest 5% of their spending back into their communities. These funds will be set aside until such time as a council project would benefit from them – such as contributing to a new park, playground, or memorial.
